Flashe® Vinyl Paint

SO FLAT

More than matte. More than flat.

Rich matte color without the distraction of texture or glare.

Flowing consistency and leveling capability as it dries.

Exceptional coverage - opaque in one or two coats (most colors).

Non-glaring finish makes it ideal for photography and digital presentation.

The Professional Choice

SPECIALTY COLORS
Dusk colors create dark granulating color with vibrant, even undertone.
Metallic colors look like a layer of precious metal in which the light reflects.
Interference colors have a uniform glow similar to mother-of-pearl.
Chameleon colors change when you change your viewing angle or lighting
Spark colors shine like the night sky as result of the reflective pigment.

MONO-PIGMENTED COLORS
Formulated using only one pigment, making them brilliant and easy to mix into clear and clean colors.

PERFECT FOR Plein Air

DERWENT

Inktense Colors are unlike watercolors in that they dry quickly and the colors remain fixed.

Metallic Colors contain shimmering pigments that stand out against both light and dark papers.

Graphitint Colors contain a unique blend of graphite and color to create subtle muted colors with a graphite sheen.

Creating Fields of Blue

Make beautifully detailed monochromatic designs with the Jacquard Cyanotype Kit

Cyanotype is the "original" sun-printing process, one of the earliest photographic techniques. Discovered in 1842, it became famously known for making impressions of biological specimens in the field ("photograms").

With Jacquard's Cyanotype Kit, you can make detailed prints from virtually any object that casts a shadow: tools, toys, plants, leaves, stones, sand, string, lace, etc. Use it on any natural fiber/porous surface, including cotton, linen, silk, canvas, wood, paper, wood and leather.
